# WEATHER OF CONCERN

## Weather of Concern

- A Fire Weather Watch remains in effect Sunday afternoon and evening for the eastern Sierra from Tahoe to Mono County. These areas are most prone to late season fire concerns due to the prolonged dry weather and lack of moisture in the higher elevations.

## **Southern California**

- Santa Ana winds starting on Tuesday and peaking Tuesday night and Wednesday morning. Elevated fire danger during this period due to winds and low humidity.

# Key Points

10/27/18 - 11/02/18

## Saturday - Monday

- Elevated fire weather conditions across portions of southern CA due to sundowner and offshore winds.
- Critical fire weather conditions Sunday due to gusty winds and dry conditions in portions of eastern CA, including Mono and Alpine Counties, and the Greater Lake Tahoe area.
- Rain across northern coastal areas Saturday through Monday. Dry conditions across the rest of the state. No significant impacts due to precipitation.

## Tuesday – Friday

- Dry conditions across the state for most of the week.
- Elevated fire weather conditions possible across much of the state Tuesday through Friday due to dry conditions and increasing winds.
  - These locations could include portions of inland California, particularly the western Sacramento Valley, and portions of the coast from the Bay Area down to the US/Mexico border due to sundowner and offshore winds

# WEATHER SYNOPSIS BY REGION

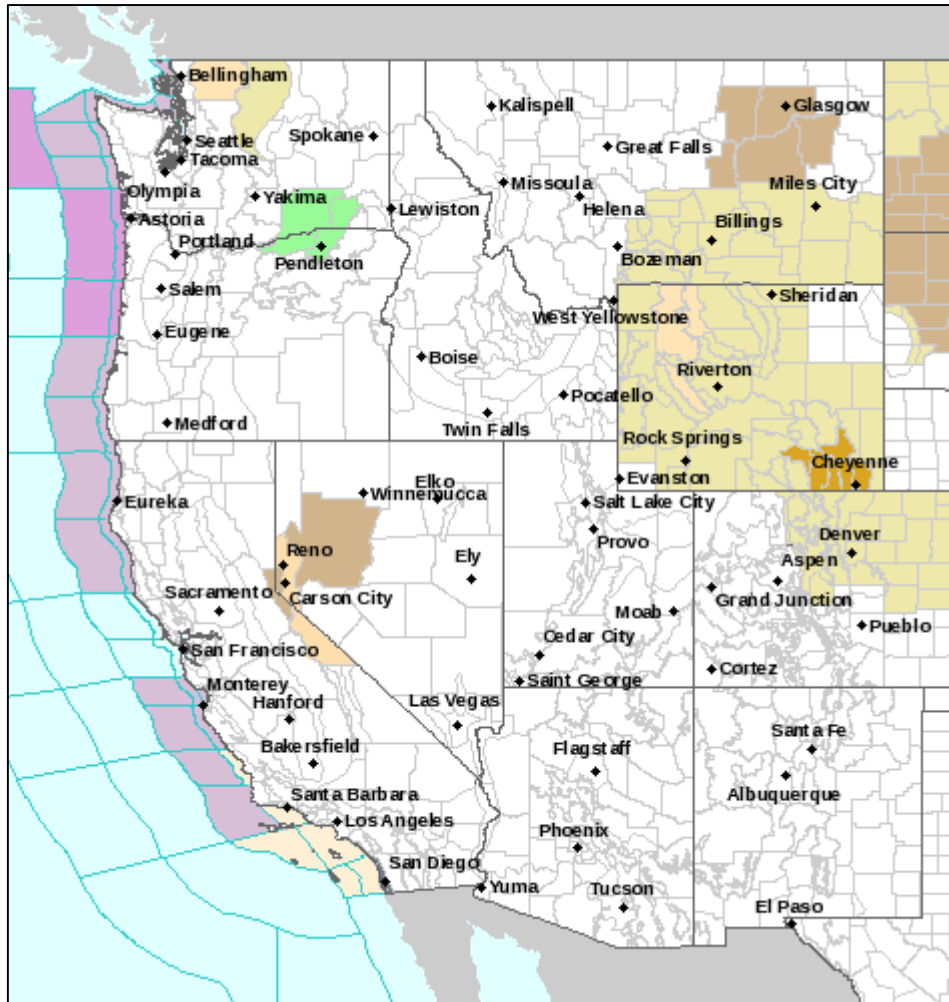

## **NORTHERN CALIFORNIA**

- High Risk Sunday southern portions of Far Eastside due to Gusty SW-W winds and marginally Low Relative Humidity (RH)
- High Risk Tue-Fri for Strong N-NE/Offshore Winds and Low RH Western Cascade-Sierra Slopes to the Coast
- High pressure ridge today, break down of the ridge Sun-Mon then dominant high pressure rest of week into following weekend.
- Wetting precipitation likely with cold frontal passage tonight through Sun night NW quarter of the region favoring North Coast-NW Mtn, otherwise dry.
- Strengthening S-SW wind (gusts 20-25 mph favoring north) later today then transitioning to W-SW wind (gusts 30-40 mph favoring NC areas as well as along and east of the Crest) Sunday due to frontal passage.
- Transitioning NW-N winds (gusts 20-25 mph) Mon before turning N-NE/Offshore (gusts 30-40 mph) winds Mon night through Fri.
- Humidity gradually rises during weekend but lower next week, especially latter half of the week into following weekend.
- Above normal temperatures today, averaging near normal Sun-Tue before becoming above normal Wed into next weekend.

## **SOUTHERN CALIFORNIA**

- Strong high pressure will keep all storm systems well north of the area the next couple of weeks. A pair of weak troughs will bring gusty winds to a few areas Sunday and again during the middle of next week. Temperatures will trend cooler after today, but offshore winds will produce warmer weather over Southern California beginning next Wednesday.
- Today will be the warmest day of the outlook period with highs in the 70s in the mountains to the lower to mid 90s in the valleys. A cooling trend will begin Sunday, and by Monday, highs will be in the 50s in the mountains above 5,000 feet to the 70s at lower elevations. Look for temperatures to warm back up next Wednesday.
- West winds 15-25 mph with gusts to 45 mph possible along the Sierra Crest north of Fresno County and in Mono County Sunday.
- Gusty north winds of 20-30 mph possible across the I-5 Corridor and Santa Barbara County Monday night into Tuesday. Similar wind speeds will occur over the desert Tuesday afternoon.
- Offshore winds look to begin late Tuesday night and may last into Friday. At this time, the winds do not appear too strong with speeds expected to be generally in the 15-30 mph range, but this may be a prolonged, multi-day offshore event.
- No precipitation is expected the next 2 weeks.
